

The graph displays three loss curves over 5000 epochs. The x-axis represents the 'Epoch' from 0 to 5000, and the y-axis represents the 'Loss' from 0.00 to 0.10. The 'Baseline loss curve' (grey) is a noisy line fluctuating around a loss of 0.05. The 'Model 0 loss curve' (blue) is also noisy and fluctuates around 0.05. The 'Ensemble data loss' (blue line with circular markers) starts at approximately 0.05, rises slightly at epoch 1000, then decreases steadily to about 0.01 by epoch 4000, where it plateaus.
