

The graph displays three loss curves over 5000 epochs. The Baseline loss curve (grey) is highly volatile and remains at a high level. The Model 0 loss curve (blue) starts high, drops to the baseline level by epoch 500, and then drops sharply again after epoch 1500. The Ensemble data loss curve (blue) follows the Model 0 curve closely, showing a similar pattern of drops.

| Epoch | Baseline loss curve | Model 0 loss curve | Ensemble data loss |
|-------|---------------------|--------------------|--------------------|
| 0     | High                | High               | High               |
| 500   | High                | High               | High               |
| 1000  | High                | High               | High               |
| 1500  | High                | High               | High               |
| 2000  | High                | Low                | Low                |
| 2500  | High                | Low                | Low                |
| 3000  | High                | Low                | Low                |
| 3500  | High                | Low                | Low                |
| 4000  | High                | Low                | Low                |
| 4500  | High                | Low                | Low                |
| 5000  | High                | Low                | Low                |
