

The graph displays two loss curves over 5000 epochs. The 'Model 0 loss curve' is a highly volatile blue line that remains at a high loss level (around 0.45) for the first 500 epochs before dropping sharply to a lower, stable level (around 0.15) by epoch 1000. The 'Ensemble data loss' is a smooth red line with circular markers that starts at a high loss (around 0.45) and decreases steadily, reaching a plateau around epoch 4000. The x-axis is labeled 'Epoch' and ranges from 0 to 5000. The y-axis represents the loss value, ranging from 0.0 to 0.5.

Epoch	Model 0 loss curve	Ensemble data loss
0	0.45	0.45
500	0.45	0.45
1000	0.45	0.44
