

The graph illustrates the performance of three different loss curves over 5000 epochs. The y-axis represents the loss, ranging from 0.00 to 0.10. The x-axis represents the epoch number, ranging from 0 to 5000.

- Baseline loss curve (grey line):** This curve shows a noisy, relatively flat performance, fluctuating between approximately 0.03 and 0.05 throughout the training process.
- Model 0 loss curve (blue line):** This curve starts at a loss of 0.10 at epoch 0 and drops sharply to approximately 0.04 by epoch 1000. It then remains relatively flat, ending at approximately 0.04 at epoch 5000.
- Ensemble data loss (blue line with dots):** This curve starts at a loss of 0.10 at epoch 0 and decreases steadily, reaching approximately 0.01 by epoch 5000.

| Epoch | Baseline loss curve | Model 0 loss curve | Ensemble data loss |
|-------|---------------------|--------------------|--------------------|
| 0     | 0.04                | 0.10               | 0.10               |
| 1000  | 0.04                | 0.04               | 0.06               |
| 2000  | 0.04                | 0.04               | 0.03               |
| 3000  | 0.04                | 0.04               | 0.02               |
| 4000  | 0.04                | 0.04               | 0.015              |
| 5000  | 0.04                | 0.04               | 0.01               |
