

The graph illustrates the performance of three different loss curves over 5000 epochs. The x-axis represents the 'Epoch' (0 to 5000) and the y-axis represents the 'Loss' (0.00 to 0.10). The 'Baseline loss curve' (grey) shows a noisy, relatively flat loss around 0.07. The 'Model 0 loss curve' (blue line) shows a significant decrease in loss, starting at 0.07 and reaching approximately 0.01 by epoch 5000. The 'Ensemble data loss' (blue line with dots) follows the Model 0 curve closely, starting at 0.07 and reaching approximately 0.01 by epoch 5000.
