

The graph displays three loss curves over 5000 epochs. The 'Baseline loss curve' is a noisy grey line. The 'Model 0 loss curve' is a smooth blue line that decreases steadily. The 'Ensemble data loss' is a blue line with circular markers that follows Model 0 until epoch 500, then drops significantly, indicating better performance after ensemble data is introduced.

Epoch	Baseline loss curve	Model 0 loss curve	Ensemble data loss
0	High and noisy	High	High
500	High and noisy	Medium-High	Medium-High
1000	High and noisy	Medium	Medium
1500	High and noisy	Low-Medium	Low-Medium
2000	High and noisy	Low	Low
2500	High and noisy	Lower	Lower
3000	High and noisy	Lowest	Lowest
3500	High and noisy	Lowest	Lowest
4000	High and noisy	Lowest	Lowest
4500	High and noisy	Lowest	Lowest
5000	High and noisy	Lowest	Lowest
