

The graph displays the training loss for two different model configurations over 5000 epochs. The x-axis represents the number of epochs, and the y-axis represents the loss value. The 'Model 0 loss curve' shows a sharp initial drop followed by significant oscillations, indicating instability in the training process. In contrast, the 'Ensemble data loss' shows a more stable and consistent decrease in loss over time, eventually reaching a lower plateau than Model 0.

Epoch	Model 0 loss curve	Ensemble data loss
0	0.35	0.35
500	0.15	0.15
1000	0.15	0.15
1500	0.15	0.15
2000	0.15	0.10
2500	0.15	0.08
3000	0.15	0.05
3500	0.15	0.04
4000	0.15	0.035
4500	0.15	0.03
5000	0.15	0.03
