

The graph displays two loss curves over 4500 epochs. The 'Model 0 loss curve' (blue line) starts at a high value and drops sharply to a noisy plateau around epoch 100. The 'Ensemble data loss' (red line with markers) starts at epoch 500 with a value slightly above the plateau and then decreases steadily to epoch 4500.

Epoch	Model 0 loss curve	Ensemble data loss
0	High	-
100	High (start of plateau)	-
500	High (on plateau)	High (start of decrease)
1000	High (on plateau)	High
1500	High (on plateau)	High
2000	High (on plateau)	Medium-High
2500	High (on plateau)	Medium
3000	High (on plateau)	Low-Medium
3500	High (on plateau)	Low
4000	High (on plateau)	Lower
4500	High (on plateau)	Lowest
