

The graph displays the training loss for two different model configurations over 5000 epochs. The x-axis represents the number of epochs, and the y-axis represents the loss value. A horizontal dashed line indicates a baseline loss level.

Legend:

- Model 0 loss curve (Solid blue line)
- Ensemble data loss (Blue line with circular markers)

The Model 0 loss curve shows high initial variance and stabilizes around the baseline loss. The Ensemble data loss shows a more consistent and significant reduction in loss over time, eventually reaching a lower value than the baseline.

Epoch	Model 0 loss curve	Ensemble data loss
0	0.0018	0.0018
500	0.0015	0.0015
1000	0.0015	0.0015
1500	0.0015	0.0015
2000	0.0015	0.0012
2500	0.0015	0.0010
3000	0.0015	0.0008
3500	0.0015	0.0007
4000	0.0015	0.0006
4500	0.0015	0.0005
5000	0.0015	0.0005

Figure 1 is a line plot showing the training loss of the proposed model across 5000 epochs. The y-axis represents the Loss, ranging from -0.2 to 0.2. The x-axis represents the Epoch (cumulative), ranging from 0 to 5000. The plot displays the training loss for five models: M1, M2, M3, M4, and M9. Each model has three lines representing different components: dual (solid line), data (dashed line), and ens (dotted line). The loss generally decreases over time, with some models showing a sharp increase around epoch 3000.

Epoch (cumulative)	M1 dual	M1 data	M1 ens	M2 dual	M2 data	M2 ens	M3 dual	M4 dual	M4 ens	M9 dual	M9 data	M9 ens
0	0.05	0.08	-0.08	0.05	0.08	-0.08	0.05	0.05	0.05	0.05	0.05	0.05
1000	0.02	0.02	0.00	0.02	0.02	0.00	0.02	0.02	0.02	0.02	0.02	0.02
2000	0.01	0.01	-0.10	0.01	0.01	-0.10	0.01	0.01	0.01	0.01	0.01	0.01
3000	0.00	0.00	-0.17	0.00	0.00	-0.17	0.00	0.00	0.00	0.00	0.00	0.00
