

The graph displays the training loss for three different models over 5000 epochs. The baseline model (grey) maintains a high, stable loss. The individual model (blue) shows a significant decrease in loss, reaching a plateau around epoch 1500. The ensemble model (blue with markers) follows the individual model's loss curve closely, indicating that the ensemble method effectively reduces the loss.

Epoch	Baseline loss curve	Model 0 loss curve	Ensemble data loss
0	High	High	High
1000	High	Medium-High	Medium-High
1500	High	Low	Low
2000	High	Low-Medium	Low-Medium
2500	High	Low	Low
3000	High	Low	Low
3500	High	Low	Low
4000	High	Low	Low
4500	High	Low	Low
5000	High	Low	Low
