

Figure 1 is a line graph illustrating the loss curves for three different models over 5000 epochs. The x-axis represents the Epoch number, ranging from 0 to 5000. The y-axis represents the loss, ranging from 0.0 to 0.5. The legend identifies three curves: Baseline loss curve (grey), Model 0 loss curve (blue), and Ensemble data loss (blue with markers).

The Baseline loss curve (grey) shows high volatility, fluctuating between approximately 0.2 and 0.5 throughout the training process. The Model 0 loss curve (blue) starts at a loss of approximately 0.4 at epoch 0, drops sharply to about 0.15 at epoch 2000, and then continues to decrease gradually, reaching approximately 0.05 by epoch 5000. The Ensemble data loss curve (blue with markers) follows a similar trend to the Model 0 loss curve, starting at approximately 0.4, dropping to about 0.15 at epoch 1500, and then gradually decreasing to approximately 0.05 by epoch 5000.

Epoch	Baseline loss curve	Model 0 loss curve	Ensemble data loss
0	~0.4	~0.4	~0.4
1000	~0.4	~0.35	~0.35
2000	~0.4	~0.15	~0.15
3000	~0.4	~0.1	~0.1
4000	~0.4	~0.08	~0.08
5000	~0.4	~0.05	~0.05
