

The graph displays the training progress of two models over 4000 epochs. The x-axis represents the number of epochs, and the y-axis represents the loss. The 'Model 0 loss curve' is shown as a solid blue line, and the 'Ensemble data loss' is shown as a solid blue line with circular markers. Both curves start at a high loss value (around 0.8) and decrease rapidly, stabilizing after approximately 1600 epochs. The ensemble data loss is slightly lower than the Model 0 loss curve after the initial training phase.

Epoch	Model 0 loss curve	Ensemble data loss
0	0.80	0.80
400	0.45	0.45
800	0.35	0.35
1200	0.25	0.25
1600	0.15	0.15
2000	0.14	0.14
2400	0.13	0.13
2800	0.13	0.13
3200	0.10	0.10
3600	0.09	0.09
4000	0.08	0.08
