

Figure 1 is a line graph illustrating the loss curves for three different models over 4000 epochs. The x-axis represents the Epoch number, ranging from 0 to 4000. The y-axis represents the Loss, ranging from 0.00 to 0.10. The legend identifies three curves: Baseline loss curve (grey), Model 0 loss curve (blue), and Ensemble data loss (blue line with dots). The Baseline loss curve shows high variability, fluctuating between approximately 0.02 and 0.08. The Model 0 loss curve starts at 0.10 and decreases to about 0.05 by epoch 400, then continues to decrease slowly to approximately 0.015 by epoch 4000. The Ensemble data loss curve starts at 0.10 and decreases steadily, reaching approximately 0.015 by epoch 4000.
