

The graph illustrates the performance of three different loss curves over 4000 epochs. The x-axis represents the 'Epoch' number, ranging from 0 to 4000. The y-axis represents the 'Loss' value, ranging from 0.00 to 0.10. The 'Baseline loss curve' (grey line) shows high volatility, fluctuating between approximately 0.02 and 0.08. The 'Model 0 loss curve' (blue line) starts at a loss of 0.05 and decreases steadily to approximately 0.01. The 'Ensemble data loss' (blue line with dots) follows the Model 0 loss curve closely, starting at 0.05 and decreasing to approximately 0.01.
