

The graph displays three loss curves over 4000 epochs. The 'Baseline loss curve' (grey) is highly volatile and remains relatively flat around a loss of 0.05. The 'Model 0 loss curve' (blue) shows a steady decrease from 0.10 to approximately 0.05. The 'Ensemble data loss' (blue) shows a more significant decrease, starting at 0.10 and ending near 0.02, indicating better performance than the individual models.
