

The graph displays three loss curves over 4000 epochs. The 'Baseline loss curve' (grey) is highly volatile and remains relatively flat around a loss of 0.05. The 'Model 0 loss curve' (blue) starts at approximately 0.05 and decreases steadily to about 0.01. The 'Ensemble data loss' (blue) also starts at approximately 0.05 and decreases to about 0.01, following a similar trend to the Model 0 loss curve but with slightly different intermediate values.
