

Figure 1 is a line graph showing the loss curves for three different models over 4000 epochs. The x-axis represents the Epoch number, ranging from 0 to 4000. The y-axis represents the loss, ranging from 0.00 to 0.10. The legend identifies three curves: Baseline loss curve (grey line), Model 0 loss curve (blue line), and Ensemble data loss (blue line with circular markers).

The Baseline loss curve (grey line) shows a highly volatile loss, fluctuating between approximately 0.02 and 0.08 throughout the training process. The Model 0 loss curve (blue line) shows a steady decrease in loss, starting at approximately 0.08 and ending at approximately 0.02. The Ensemble data loss (blue line with circular markers) shows a significant decrease in loss, starting at approximately 0.08 and ending at approximately 0.01, indicating that the ensemble model achieves a lower loss than the individual models.

| Epoch | Baseline loss curve | Model 0 loss curve | Ensemble data loss |
|-------|---------------------|--------------------|--------------------|
| 0     | 0.08                | 0.08               | 0.08               |
| 500   | 0.05                | 0.06               | 0.06               |
| 1000  | 0.05                | 0.05               | 0.05               |
| 1500  | 0.05                | 0.04               | 0.04               |
| 2000  | 0.05                | 0.03               | 0.03               |
| 2500  | 0.05                | 0.02               | 0.02               |
| 3000  | 0.05                | 0.015              | 0.015              |
| 3500  | 0.05                | 0.01               | 0.01               |
| 4000  | 0.05                | 0.02               | 0.01               |
