

The graph displays three loss curves over 4000 epochs. The Baseline loss curve (grey) drops sharply from a high value to a low, stable value around epoch 100. The Model 0 loss curve (blue) drops sharply and then rises steadily, reaching a value of approximately 0.0015 at epoch 4000. The Ensemble data loss (blue dots) follows the Model 0 curve but stays below it after the initial drop, reaching a value of approximately 0.001 at epoch 4000.

Epoch	Baseline loss curve	Model 0 loss curve	Ensemble data loss
0	0.0015	0.0015	0.0015
500	0.0005	0.0005	0.0005
1000	0.0005	0.0008	0.0008
1500	0.0005	0.0011	0.0011
2000	0.0005	0.0013	0.0013
2500	0.0005	0.0014	0.0014
3000	0.0005	0.0015	0.0015
3500	0.0005	0.0016	0.0016
4000	0.0005	0.0015	0.001

Figure 1 is a line plot showing the training loss of the proposed model across different epochs. The x-axis represents the Epoch (cumulative) from 0 to 4000, and the y-axis represents the Loss from -0.06 to 0.06. The plot displays the training loss for five models (M1, M2, M3, M4, and M9) under three different configurations: dual, data, and ensemble (ens). The dual and data variants show a step-wise increase in loss, while the ensemble variants show a step-wise decrease. Vertical dotted lines indicate the epochs where new models are introduced.

Epoch (cumulative)	M1 dual	M1 data	M1 ens	M2 dual	M2 data	M2 ens	M3 dual	M4 dual	M9 dual
0 - 800	0.008	0.008	-0.055	-	-	-	-	-	-
800 - 1200	0.018	0.018	-0.048	0.025	0.025	-0.040	-	-	-
1200 - 1600	0.025	0.025	-0.040	0.025	0.025	-0.040	0.030	0.030	-
1600 - 2400	0.030	0.030	-0.030	0.030	0.030	-0.030	0.030	0.030	0.060
2400 - 3200	0.035	0.035	-0.025	0.035	0.035	-0.025	0.035	0.035	0.060
3200 - 4000	0.040	0.040	-0.025	0.040	0.040	-0.025	0.040	0.040	0.060
